Description:

This O/W sunscreen features Kobo's Non-Nano Titanium Dioxide dispersion, HBP45TEL, to help achieve high SPF while offering minimal whitening without using a nanoparticle. Also featured is TNSS75MZCM, Kobo's Non-Nano Zinc Oxide dispersion, that contains Ethylhexyl Methoxycrylene to maintain the integrity of the UV filter and boost critical wavelength. SunBoost ATB™, which contains a proprietary ratio of anti-oxidants, anti-irritant and anti-inflammatory agents, helps boost SPF and PFA. To give water-resistant properties DAITOSOL 5000AD, a transparent type of film former, is used in this sunscreen. Kobo's spherical silica microsphere, MSS-500W, gives slip during application and reduces shine on the skin.

Description:

This elegant Zinc-only O/W Sunscreen uses two different particle sized Zinc Oxide Dispersions, TNP5OZSI and TNPB80MZCM-G to provide broad spectrum protection from the Sun's harmful UV rays. The use of combining Non-nano Zinc with nano provides an overall better coverage for improved SPF/PFA results. Kobo's SunBoost ATB™ is a booster to help increase the SPF/PFA values. CPF-3300@10cSt is a silicone fluid that can improve the spreadability and, due to its high refractive index, can also disguise wrinkles and fine lines. Kobo's spherical silica Microsphere, MSS-500, gives slip during application and reduces shine on the skin.

Manufacturing Procedure:

1. Begin Prop mixing Part 1 then add Slurry Part 2.
2. Combine Part 3 and heat to 70°C under homogenizer.
3. Slowly add Part 3 to Parts 1 and 2 while homogenizing at 70°C.
4. Begin cool down to 40°C then add Part 4.
