

Solid Microsphere Complexes

Americas Program

Solid Microsphere Complexes are blends of materials of different composition which create products with unique characteristics and performances.

MSX-511 combines PMMA and Calcium Phosphate for feel, soft focus and oil absorption. **GWC-500EP** blends two microspheres for a silky skin feel and excellent soft focus. **KoboBlur™ 100 Natural** is made only of minerals and natural ingredients, using no plastic particles; the ingredients of this complex have complimentary refractive indexes and scatter light in a wide range of formulas.
