Description:

This 2-in-1 formula, suitable for lip and cheek application, provides a cushiony-soft texture and semi-matte finish. It features a combination of Ikeda's esters (T.I.O., SALACOS® 5418V, SALACOS® WO-6) and Avantor's silicones (CPF-3300@10cSt, CXG-1101 and CSF-3504) ranging from low to high viscosity. This combination imparts spreadability and comfort upon application. INBP are pigmentary dispersions in Isononyl Isononanoate that provide a fully developed wide range of colors. PM WAX 82, a combination of waxes, helps with the structure of the formulation in association with NOMCORT® HK-G, an oil phase gellant, that also helps to improve formula stability. For adhesion and substantivity of the formula to the skin, film former KOBOGUARD® MQ65TMF is used. Boron Nitride, CARESS® BN12 has a translucent appearance and provides a very soft and silky touch to the lips and cheeks. MSS-500W gives slip during application and soft focus.

Manufacturing Procedure:

1. Combine Part 1 and heat to 80-85°C.
2. Add Part 2 and mix until homogeneous.
3. Cool to 60°C and add Part 3.
4. Add Part 4 and cool to 25°C under stirring.
