Description:

Sleek Blush touch-up cream-to-powder formula blends seamlessly on skin and looks totally natural and flattering on many skin tones. It layers beautifully over makeup, blurring the look of pores and fine lines while hiding discolorations and uneven skin tone. Kobo's TTB-Treated Pigments provide flawless coverage and enhance formula wear. This treatment is both hydrophobic and lipophilic. PMLVP pigmentary dispersion of D&C Red 7 Ca lake in Isododecane adds a burst of pink which compliments the orange/dark red of Red Iron Oxide and makes the shade look more natural especially on skin with yellow, warm undertones. FLORITE PS-10 works as a base layer and helps to absorb sebum and excess oils from skin. CPF-3300@10cSt is a low viscosity phenyl trimethicone which provides a subtle glow and lightweight slip.

Manufacturing Procedure:

1. Combine Part 1. Homogenize until fully dispersed.
2. Add Part 2 to batch. Prop mix at 80°C.
3. Add Part 3 to batch until homogeneous.
4. Combine Part 4 and micropulverize until uniform.
5. Slowly Add Part 5 to Part 4 until homogeneous.
6. Add Parts 4 and 5 to batch until homogeneous.
7. Pour into molds at 75°C.
