Description:

This is a glide-on blush formula that imparts a sheer, rosy glow to the cheeks with a non sticky, non oily texture. The ASGP treated pigments have been selected for their low energy dispersibility. Formula also contains KOBOGUARD® NATURAL 2063-CCT, an oil soluble film former to enhance the longevity of the formula on the skin. MSS-500/N, a non-absorbing silica microsphere helps to improve the glide and CELLULOBEADS D-10-NPC2, cellulose with hydrogenated lecithin treatment helps to achieve a creamy texture. MSS-500/3H has been used here to support the structure of the stick and to prevent sweating. KOBOPEARL® EF-8 and KTZ® CLASSIC WHITE both contribute a high reflective finish that is perceived as a fresh, dewy effect on the skin.

Manufacturing Procedure:

1. Combine Part 1 ingredients in sequence and homogenise under Silverson Square head at 5000 RPM for around 1 minute.
2. Add Part 2 and heat upto 90 degrees Celsius, add Part 3 and mix until homogenous.
3. Pour into containers at 85 degrees Celsius and leave to cool at RT.
