Description:

This illuminating concealer features K-RAY® pearl that gives a shiny and illuminated look to the skin. It also has CARESS® BN30, a large Boron Nitride particle, and KOBOPEARL 500-SR, a "muted" pearl, that helps with skin radiance. For the color, it has 11SP treated pigments, a hybrid treatment that is easy to disperse and offers adherence to the skin. CXG-1104 is an elastomer gel that gives nice feel and velvet effect. CPF-3300@10cSt, a Phenyl Trimethicone with low viscosity, and SALACOS® 99, a light ester, improve spreadability. COSMOL™ 182V is an ester that helps with dispersability and stability. MST-547-FS is a polymethylsilsesquioxane microsphere that gives a nice feel and has good adherence to the skin.

Manufacturing Procedure:

1. Mix Part 2 until the pigments are fully dispersed. □
2. Combine Part 1 ingredients and add to Part 2 slowly while mixing. □
3. Add Part 3 and mix until homogenous.
