## Description:

This intense, black, liquid eyeliner spreads on with ease, creating a unique, sticky, adhering tape that allows gluing of magnetic faux lashes to it. The formula features WSJ22BNF-O, a black iron oxide dispersion which contributes film forming properties and adds the black color. DAITOSOL 5000AD contributes to water-resistant properties. DAITOSOL 5000STY is used to create a long-wearing film and adds glue-like properties to the formula, giving the ability to hold faux lashes over eye lids during wear.

## Manufacturing Procedure:

1. Prop-mix Part 1 until fully dispersed. ▢
2. Add Part 2 to Part 1 until uniform. ▢
3. Add Part 3 to batch until homogeneous. ▢
4. Add Part 4 to batch until uniform. ▢
5. Add Part 5 to batch until uniform.
