## Description:

This wrinkle filler creates a veil-like effect on the skin which fills in and blurs imperfections, leaving smooth, flawless skin by minimizing the appearance of redness, large pores and wrinkles. KoboMica SM-08 imparts a smooth, even application and good adherence on the skin. CARESS® BN06, Boron Nitride, is used for superior softness and tactility, superb spreadability, and good coverage. DSPCS/20N-12 gives a lightweight feel and helps the formula go immediately into a powder on the skin. SW5M5, a fumed silica gellant, thickens the formula and offers added shine and stability. Adhesion, long wear and water resistant film are provided by a combination of KOBOGUARD® HRPC and KOBOGUARD® MQ75ETS. ZINC MYRISTATE (MB) binds powders, oils and waxes together and helps in sharpening.

## Manufacturing Procedure:

1. Combine Parts 2 and 3. Prop mix high shear at 95°C.
2. Slowly add Part 1 to batch. Mix at 95°C.
3. Pour into components at 85°C.
