Description:

This multi-use lip and cheek formula is easy-to-apply and provides buildable, blendable, rose lip and blush color. It features Kobo's creamy INWP Pigmentary Dispersions, which ease the manufacturing and laboratory process by melting into the batch around 75-80°C. KOBOGUARD® 5400 SQ, resin composite, gives quick build up with a water-resistant film and aids in long wear. ASO-I2, an ITT treated starch provides a creamy feel to the lips and cheeks and absorbs excess sebum. MSS-500/N gives an excellent application and soft focus effect to help blur the appearance of lines and wrinkles on the lips and face. MSP-822 is a microsphere that adds a luxurious, creamy texture. SILICA SHELLS gives a velvet-like effect on the lips and cheeks.

Manufacturing Procedure:

1. Combine Part 1. Homogenize until fully dispersed.
2. Add Part 2 while homogenizing then add Part 3 until uniform.
3. Switch to prop mix then add Part 4 at 85°C.
4. Add Part 5 until homogeneous.
5. Pour into molds at 75°C.
