100.00			

Description:

A w/si fluid emulsion designed for daily broad spectrum UV protection characterized by its light-as-air application and café au lait color. It contains NHP55STS-W, a natural origin, pourable, non-nano by PS TiO2 dispersion with 44% active level in combination with TNP65MZS, a larger particle size, pourable, non-nano by PS Zinc Oxide dispersion with 61% active level for high UVB and UVA protection, boosted by SunBoost ATB. The film former KOBOGUARD® MQ60DM is used to help create an even deposition of filters on the skin. KTZ® EBONY, a black pearl, DIM2F50TRR and DIM2F45TRY, red and yellow transparent iron oxide dispersions, are used at low levels to create the café au lait bulk color of the formula, which vanishes upon application, to leave a completely sheer, glowy look, even on deeper skin tones. This microplastic-free formula makes use of the slip and ball bearing effect given by MSS-500/N and the softness given by CELLULOBEADS D-10-NPC2 to create a skin feel normally attributed to PMMA.

Manufacturing Procedure:

1. Combine Part 1. Add Part 2 to Part 1 under homogenizer, 3000 rpm for 5 minutes to disperse it.
2. Prepare Part 3.
3. Add Part 3 to Parts 1 and 2 under prop stirrer, 1000 rpm.
4. Add Part 4, mix until uniform.

Active Ingredient(s):

Titanium Dioxide	7.92%
Zinc Oxide	13.42%

100.00			

Description:

This easy-to-use, waterless 3-in-1 sunscreen stick is also a primer with a glow effect, containing mostly vegetal and mineral origin ingredients. The formulation contains ZnO-C-ASG3J, a non-nano Zinc Oxide, hydrophobically modified for easy dispersion in the emollients used, to provide UV protection.

It also contains SunBoost ATB for UV protection boosting and skin protecting efficacy.

The mineral microspheres MSS-500/N and MSS-500/3H contribute to weightless application and good payoff as well as soft focus effects on the skin. CELLULOBEADS D-10-NPC2, a 10 micron cellulose microsphere with hydrogenated lecithin treatment, which renders it more creamy, contributes softness and creaminess to the stick.

The formulation is tinted with GCG50TRSG and GCG50TYSG, transparent iron oxide dispersions and KTZ® EBONY, a black iron oxide coated mica, to significantly reduce whitening caused by large particle size Zinc Oxide. The glow effect is imparted by KTZ® ARUBAN CORAL-ASG2, a special skin color blend.

Manufacturing Procedure:

1. Prepare Part 1 by dispersing powder ZnO in liquid emollients.□
2. Add Part 2, heat to 95 °C, add Part 3 followed by Part 4 and mix till homogeneous.□
3. Pour into containers at 85 °C and leave to cool at RT.

Active Ingredient(s):

Zinc Oxide 24.25%

Testing:

SPF: in vivo on 5 subjects
 UVA-PF: in vitro method
 CW: FDA method

Part 4			
2.00	CELLULOBEADS D-10-NPC2	Cellulose (And) Hydrogenated Lecithin	Kobo Products
100.00			

Description:

A creamy, natural origin Zinc Oxide sunscreen. GC70MZCSG and ZNO-660-ASGP7 provide UVA and UVB protection. SunBoost ATB Natural boosts SPF and PFA. JOS10M5 provides texture and emolliency. Plandool™-LG2 is an amino acid-derived ester that creates lameller liquid crystals and provides moisture barrier protection. CELLULOBEADS D-10-NPC2, a 10 micron cellulose microsphere with Hydrogenated Lecithin treatment, creates a creamy texture and contributes to product softness.

Manufacturing Procedure:

1. Combine Part 1 in a side beaker and mix until salt is completely dissolved.
2. Combine Part 2 and heat to 80°C. Start heating Part 1 to 80°C while keeping tightly covered.
3. With moderate homogenization, slowly add Part 1 to Part 2. Homogenize thoroughly until batch is completely emulsified.
4. With slow to moderate homogenization, add Part 3 followed by Part 4.
5. Cool batch with mixing to 40°C.

Active Ingredient(s):

Zinc Oxide 23.40%

Testing:

SPF: in vivo on 3 subjects
CW: FDA method

Part 6			
0.60	AE Preserve® PCG	Phenethylalcohol (And) Caprylhydroxamic Acid (And) Glycerin	AE Chemie
100.00			

Description:

An all Zinc natural origin mousse sunscreen with minimal whitening and easy application. Exilva FM 02-L adds extra firmness to the formulation to enhance the mousse-like texture. GCP45XZJ and JOSP55XZJ provide UVA and UVB protection. SunBoost ATB Natural is a proprietary ratio of three ingredients that boosts SPF and PFA. MSS-500/3H adds enhanced cushion, slip and spreadability on the skin.

Manufacturing Procedure:

1. Homogenize Part 1 until uniform then heat to 85-90°C and keep tightly covered.
2. Combine Parts 2 and 3. Heat to 85-90°C. Maintain temperature and homogenize Parts 2 and 3 until uniform. When uniform, add Part 4 to Parts 2 and 3. Continue homogenizing until smooth (about 10 minutes).
3. Add Parts 2, 3, and 4 to Part 1 under homogenizer higher shear (1500 rpm). Continue mixing for 3 minutes or until fully smooth. Remove from heat.
4. Sprinkle in Part 5. Homogenize until smooth.
5. Switch to propeller mixer- sweep blade at 40 rpm. Add Part 6 at 45°C. Continue mixing until 28°C.

Active Ingredient(s):

Zinc Oxide 24.04%

Testing:

SPF: in vivo on 5 subjects

100.00			

Description:

A very simple, cold process w/o lotion containing mineral filters in surface treated powder form. The formula is very easy to spread on the skin, has a light feel and rubs in without any residue or white cast. A10-TiO2-SA-ASG8, a 10 nm PPS Titanium Dioxide with natural origin surface treatment and ZnO-660-ASGP7, a 25 nm PPS Zinc Oxide with superdispersible natural origin surface treatment disperse easily in chosen natural emollients. Both powders are non-nano by PS and chosen for their high transparency. Sunboost ATB Natural is used at 4% to boost UV protection and contribute antioxidant skin protection to the formula. CELLULOBEADS D10-NPC2, Cellulose beads with natural origin Hydrogenated Lecithin treatment which renders it ultra creamy and soft are used in combination with MSS-500/N, a 12 micron average PS non-absorbing silica bead to improve the feel, cut tack and impart a matte finish on the skin.

Manufacturing Procedure:

1. Prepare Part 1 by dispersing the powders in the liquid ingredients.
2. Mix Part 2.
3. Emulsify under propeller stirrer at 800-1000 rpm.
4. Homogenize for 1-2 minutes at 3000 rpm.
5. Add the powders of Part 3.

Active Ingredient(s):

Titanium Dioxide	5.25%
Zinc Oxide	9.30%

Testing:

SPF: in vivo on 3 subjects

Description:

A Zinc Oxide only sunscreen lotion with broad spectrum protection. NHD75MZCOE is a natural origin ZnO-C dispersion. This dispersion features a 265nm primary particle size Zinc Oxide which provides UV protection. CXG-1104 is a silicone elastomer that provides a silky texture, soft focus/mattifying effect, and thickens the oil phase. Sunboost ATB is a proprietary mixture of antioxidant, anti-irritant and anti-inflammatory agents. It boosts SPF and PFA values of sunscreens when used with UV filters.

Manufacturing Procedure:

1. Combine Part 1 in main beaker and heat to 70°C while mixing under homogenizer for 10 minutes. □
2. Combine Part 1 and 2 under homogenizer in main beaker at 70°C and mix for 10 minutes or until all powders are dispersed. □
3. Combine Part 3 in a separate beaker and mix on prop mixer at 70°C until all ingredients are dissolved. □
4. Slowly add water phase to main beaker at 70°C under high shear (4500-5000) rpm for 10 minutes to emulsify.

Active Ingredient(s):

Zinc Oxide 15.00%

Description:

A light beige facial hydrating lotion that protects skin from blue light during indoor and outdoor activities. TNP45TELR offers protection from damaging blue light (HEV). This dispersion also contains Transparent Red Iron Oxide to tint the formula. TNP70MZ provides UVB/UVA protection. TNP55TRY works in combination with the Transparent Red Iron Oxide used in TNP45TELR to create the light beige tint in order to mitigate a blue/white cast on deep skin tones. Cn-HAHWS contains Sodium Hyaluronate and provides hydration and moisture to skin. MSS-500W contributes to the silky and non-oily feel.

Manufacturing Procedure:

1. In a side beaker, add Part 1 and mix until salts have dissolved and batch is uniform.
2. In main beaker, add Part 2 and prop mix until uniform.
3. Add Part 1 to Part 2 slowly under the homomixer, mix until uniform. Check between slides for color streaks. Stop mixing and store bulk in glass jars.

Active Ingredient(s):

Titanium Oxide 2.40%
Zinc Oxide 7.38%

Description:

A matte cream foundation with exceptional coverage and comfort on skin. It's full coverage without the mess. Kobo's natural origin OD pigmentary dispersions provide the color and coverage. They are easy to blend and use in shade matching. LUSPLAN™ DD-DA7 is a plant-derived ester that works in combination with pigments to impart barrier repair and smoothness to the skin. CELLULOBEADS D-5 contributes to the soft and delicate after feel.

Manufacturing Procedure:

1. Combine Part 1 with high shear prop mix at 80° C until uniform. □
2. Add Part 2 to Part 1 and mix until uniform. □
3. Add Part 3 to Parts 1 and 2. Mix until uniform at 80° C. □
3. Combine Part 4 under homogenizer. Mix until color is fully developed. □
4. Switch Part 4 to prop mix at 80° C. □
5. Slowly add Part 4 to Parts 1, 2 and 3. Mix at 80° C until uniform. □
6. Add Part 5 and then begin cooling until uniform.

Description:

This is a medium coverage liquid foundation with UV protection which will leave skin looking flawless and dewy while protecting skin from the sun. This formula features ZNO-750-ASGP6 for balanced UVB/UVA protection. ASGP-treated ZnO requires minimal energy to disperse. SunBoost ATB Natural is a proprietary ratio of three ingredients that boosts in-vivo SPF and PFA along with providing skin care benefits. ASGP-treated Iron Oxides and Titanium Dioxide provide coverage and the shade. They disperse easily and promote better wear properties due to the ASGP-treated pigments' adhesion to skin. AQUA KEEP 10SH-NFC gels the aqueous phase and offers stability to the formula. MAKIBASE SEB is a vegetable-based, PEG-free emulsifier which helps the formula absorb and provides a non-greasy feel. CELLULOBEADS D-5-ASG3 provides softness, creaminess and reduces tack. Cn-HAHWS contains encapsulated Sodium Hyaluronate which is a skin moisturizer.

Manufacturing Procedure:

1. Combine Part 1 under homogenizer and mix well.
2. Pre-mix Part 2 and slowly add to Part 1 under the homogenizer until smooth and uniform.
3. Pre-mix Part 3 and then add slowly to Parts 1 and 2 while homogenizing.
4. Add Part 4 and Part 5 to Parts 1, 2, and 3. Continue mixing until uniform.

Active Ingredient(s):

Zinc Oxide 12.00%

Testing:

SPF: in vivo on 5 subjects

Description:

A flattering, easy-to-apply liquid blush formula in a cushion compact. The blush pink color is suitable for every skin tone. CPF-3300@10cSt, a low viscosity Phenyl Trimethicone, contributes to the excellent spreadability of the formula over cheekbones. CARESS® BN18 and KoboMica L-24 provide the luxurious feel and impart a sheer elegant tone. CXG-1104 contributes smoothness and a poreless appearance. The combination of four pigmentary grade PT1BM dispersions in Phenyl Trimethicone create the flattering pink shade.

Manufacturing Procedure:

1. Combine Part 1 in main beaker and heat to 70°C while mixing under homogenizer for 10 minutes.
2. Combine Parts 1 and 2 under homogenizer in main beaker at 70°C and mix for 10 minutes or until all powders are dispersed.
3. Combine Part 3 in a separate beaker and mix on prop mixer at 70°C until all ingredients are dissolved.
4. Slowly add water phase to main beaker at 70°C under high shear (4500-5000 rpm) for 10 minutes to emulsify.

Part 2			
2.00	CPF-3300@10cSt	Phenyl Trimethicone	Avantor/Kobo Products
100.00			

Description:

This multi-use finishing powder sets makeup, provides color correcting properties and offers a soft focus effect for a flawless appearance. KTZ® EXTRAFINE BLUE imparts a subtle blue iridescence that helps correct orange or yellow undertones. MSS-500W-LL10 allows the formula to roll smoothly onto the skin while providing soft focus. BN30-I2, an ITT-treated Boron Nitride, further contributes to the smooth application and slight iridescence. SILICA SHELLS absorbs excess oil to ensure makeup is long-lasting. CPF-3300@10cSt acts as a liquid binder to prevent dusting upon application.

Manufacturing Procedure:

1. Combine Part 1 and blend on low speed until powders are evenly dispersed.
2. Add Part 2 to Part 1 and blend on low speed until Phenyl Trimethicone is evenly dispersed.

100.00			

Description:

A liquid eyeliner formula that gives an intense, long-lasting color in just one swipe without pulling, or skipping on lids. It comes with a metallic finish. This vibrant and eye-catching colorful eyeliner features Kobo's WSJ Pigmentary Dispersion to create the intense color. KOBOGUARD® 50AMP-G forms an easy to apply, long-lasting, shiny and water-resistant film. MSS-500W is a microsphere which provides a smooth, precise line and uniform application. KTZ® INTERFINE GREEN imparts the metallic green hue to the eyeliner color.

Manufacturing Procedure:

1. For Part 1, pre-mix Natrosol® 250 HHR CS with Glycerin and add this to water under propeller agitation. Heat to 90°C.
2. Begin cooling Part 1 while mixing to form a gel.
3. Add Part 2 to Part 1 at 40°C and mix until uniform.
4. Add Part 3 and continue to mix.
5. Slowly add Part 4 and mix until uniform.

Description:

This Periwinkle Eyeshadow has a creamy feel, matte finish and glides smoothly across eyelids. This eyeshadow features KTZ® COLORSET BlueRed which is a rich blue effect pigment that has a red reflection and imparts the unique two-tone color and visual effect. BEUB-NJE3 which is composed of Ultramarine and Jojoba Esters offers a creamy feel and good affinity to the skin with great pressability. SERICITE GMS-4C is a creamy sericite mica that allows the formula to glide onto lids. Kobo SMC-BNCS6 provides superior softness and tactility, excellent adherence, long-lasting effect and creamy feel. The combination of MSS-500/N and ASO-NJE2 provides the matte effect and smooth after feel. ZINC MYRISTATE (MB) is a dry binder used for skin adherence and powder compressibility. LUSPLAN™ DD-DA7 provides barrier repair and smoothness to eyelids.

Manufacturing Procedure:

1. Blend Part 1 until color is fully developed.
2. Slowly add Part 2 to Part 1. Continue to blend until uniform.
3. Press at 900 psi.

Description:

This long-wearing mascara lengthens and volumizes lashes. BWBO-ASGP3 provides the deep black shade. KOBOGUARD® HRPC provides a plasticizing effect to the wax complex, and allows the mascara to be buildable upon application. Plandool™-LG1 improves malleability of the wax complex which increases bulk transfer to the lashes. SunBoost ATB conditions the lashes. MSS-500W helps the formula glide smoothly onto the lashes with increased payoff and provides volume. KOBOGUARD® 50AMP-G provides waterproofing and long wear properties. RAYON FIBER 3.3T-0.8MM(S) has a unique "cloud" shape, provides the volumizing and lengthening properties and visually improves the curling angle.

Manufacturing Procedure:

1. Homogenize Part 1 and heat to 85°C. Mix until uniform (add FiberDesign™ Sensation first then pre-mixed thickeners with glycerin). □
2. Propeller mix Part 2 and heat to 85°C. Mix until homogeneous. □
3. Slowly add Part 2 to Part 1. Continue mixing until homogeneous. □
4. Begin cooling. When batch begins to thicken, switch to sweep blade at 40 RPM. Add Part 3 at 60°C. Pre-mix Part 4 and add at 50°C. Continue mixing until batch reaches 32°C.

Description:

This creamy textured lipstick has excellent compatibility with the skin and provides a slightly dry touch to the lips. Kobo's ITT treated pigments (BTD-401, BRO-12 and RED 7CA K-12) are used to make the shade and enhance affinity to the skin. COSMOL™ 168ARV (a substitute for wool-derived lanolin with superior oxidative stability) helps with formula stability, and PM WAX 82, a combination of waxes, is used to structure the lipstick. SALACOS® 99 aids with bullet spreadability. MSS-500/3H is a Silica microspheres that give a glide-on application.

Manufacturing Procedure:

1. Heat Part 1 to 80°C under propeller mixing. □
2. Add Part 2. Mix for 10 minutes until uniform. □
3. Add Part 3. Mix until uniform.
4. Add Part 4. Mix until uniform.

100.00			

Description:

This is a sheer, hydrating balm that gives a touch of color and lasting comfort to the lips. The melting texture provides high gloss and a cushioning effect. The formula contains only natural origin ingredients, including the mineral pigments which are combined to create the enriching nude color. The ASGP-treated Manganese Violet, Titanium Dioxide and Iron Oxides disperse easily with minimal energy input. MSS-500/3H enables the stick to be structured with less wax and prevents sweating. KTZ® G QUARTZ at 0.8% lifts the gloss of the formula to another level thanks to its transparency and high shine, without being visibly sparkly.

Manufacturing Procedure:

1. Combine Part 1 ingredients.
2. Combine Part 2 ingredients and add them to Part 1, dispersing them fully.
3. Add Part 3 and disperse.
4. Add Part 4 ingredients and heat to 90°C. Keep at this temperature for a minimum of 10 minutes with stirring and add Part 5.
5. Pour into molds at 90°C and cool.

100.00			

Description:

This is a cream-to-powder liquid lip color that is characterized by its weightless wear, complete lack of tackiness and luxurious softness. The formula gives a highly blurred and matte look that is non-drying and can be comfortably worn over extended periods. The formula contains the following products that are responsible for the matte and blurred look, and powdery feel: MSS-500/H, a high oil absorption, 12 micron average particle size silica, Kobo SMC-BNCS6, a plastic-free combination of silica, cellulose and boron nitride made to match the feel of polyurethane, and KoboBlur™ 100 Natural, a plastic-free and surface treated combination of natural powders developed to give great soft focus effect across a range of emollients with different refractive indices. INBP dispersions are highly concentrated dispersions of ITT-treated pigments and are used to create the shade. They can be added to the formula without milling and grinding and are the easiest way to achieve color reproducibility and full color vibrancy.

Manufacturing Procedure:

1. Prepare Part 1 and set aside to disperse
2. Weigh Part 2 and heat until homogeneous mixture is obtained.
3. Add Part 3 and mix until homogeneous.
4. Add Part 1, Part 4 and Part 5 one by one and mix thoroughly between additions.
5. Add Part 6 and mix until uniform color is obtained.

3.00	MSS-500/3H	Silica	Kobo Products
100.00			

Description:

This ultra-pigmented lip gloss glides smoothly on lips leaving behind a vividly glossy look. This formula features Kobo's OD dispersions to create the rich pumpkin shade. CO15M5 provides the formula with superior gloss and increased wear. SunBoost ATB Natural, a proprietary ratio of anti-oxidant, anti-irritant and anti-inflammatory agents, and Plandool™-LG1, a high melt point waxy material, work together to provide emolliency, while moisturizing and hydrating the lips. MSS-500/3H offers increased payoff and enhances the creamy feel of the formulation.

Manufacturing Procedure:

1. Combine Part 1 and prop mix until the color is uniform.
2. Begin heating Part 1 to 85°C and add Part 2. Continue mixing until waxes are completely melted.
3. Start cooling batch to 60°C. Add Part 3 at this temperature and continue mixing until uniform. Pour into small lip gloss components while still warm.

100.00			

Description:

A sheer, buildable natural tinted lip balm with moisture barrier repair properties. KOBOGUARD® NATURAL 2063-CCT, a natural origin film former, provides a long-lasting flexible film. CO15M5 is a castor oil based fumed silica gellant which imparts emolliency and cushion to the application. The combination of Plandool™-MAS and Plandool™-LG3 provide moisture barrier repair properties to the lips. OD75RJE, GCG50TRSG and GCG50TYSG create the background color. CO40SS adds a pleasant, sweet taste. MSS-500W improves payoff and blurs fine lines. KTZ® EXTRAFINE SUNGLOW contributes to and compliments the shade.

Manufacturing Procedure:

1. Combine liquids of Part 1, start to heat to 85-90°C. Prop mix for 1 hour minimum (make sure that waxes are all dissolved and Part 1 is clear when hot).
2. Pre-mix Part 2, then add to Part 1 while propeller mixing. Mix until batch is uniform.
3. Pre-blend Part 3, then add to Parts 1 and 2 slowly. Do not entrap air. Mix until batch is uniform.
4. Pour at 75-80°C directly into lip balm components.

Description:

This Charcoal Clay Mask & Scrub is a 2-in-1 formula that exfoliates and detoxifies leaving smooth, clean and refreshed skin. This formula features CHARCOAL POWDER which is a natural and highly porous powder that can absorb impurities, odors, moisture, oils and sebum on the skin. KoboScrub™ SD-200, natural origin plastic-free scrubbing beads, provides strong exfoliation properties. SunBoost ATB Natural is a proprietary blend of antioxidants and skin soothing agents for skin conditioning. Cn-HAHWS (Sodium Hyaluronate) adds skin care benefits to the formula. BBO-NJE2 and K-RAY® MagBlue provide the unique midnight blue color.

Manufacturing Procedure:

1. Combine Part 1 with fast speed propeller mixing. Heat to 65°C and mix for 30 minutes until clear and uniform.
2. Pre-mix Part 2 and then add to Part 1. Mix well.
3. Slowly add Part 3, one at a time, to Parts 1 and 2.
4. Add Part 4 to the batch. Mix until homogeneous.
5. Add Part 5. Mix until uniform.

100.00			

Description:

This is a hot pour, w/o emulsion system that has a putty-like texture. This formula can be applied to the face evenly with a sponge to give a thin layer for an instantly evened out and illuminated look. If applying foundation on top, leave it to set for a few minutes. A combination of very small particle size (INP70ZSI) and medium particle size (TNP65MZS) Zinc Oxide dispersions provide UV protection. MSS-500/N, CARESS® BN06 and MSS-500/3N are responsible for the skin tone evening and smoothing effect. KOBOGUARD® 5400 IDD is added to give better adhesion to the skin. KTZ® APRICOT-11S4, a natural mica substrate based skin tone pearlescent pigment with silane treatment, which provides the subtle illumination.

Manufacturing Procedure:

1. Prepare Part 1 and homogenize until smooth.
2. Add Part 2 to Part 1 and heat until the waxes are melted.
3. Add Part 3 and get T back up 75°C.
4. Prepare a slurry of the KTZ® APRICOT-11S4 in IDD by adding the IDD in parts to the pearl and mixing to make sure there are no lumps.
5. Prepare Part 4 and heat up to 80°C.
6. Emulsify under propeller stirrer, 800 rpm until all the Part 4 is taken in.
7. Move to homogenizer (tubular round hole), homogenize for 1.5 minutes at 5000 rpm. Then turn the speed down to 1500 rpm and add the pearl slurry. Mix till homogenous.
6. Pour at 60°C and refrigerate for 15 minutes to set.

Active Ingredient(s):

Zinc Oxide 8.96%

FORMULATIONS

Product formulations are included as illustrative examples only. Kobo Products Inc. makes no representation or warranty concerning the efficacy or safety of any product manufactured using such formulations. All statements concerning the possible use of Kobo Products Inc. are for research purposes only. Responsibility for the performance or adequate testing of any product prior to sale or use of any such product lies with the manufacturer thereof.

USE OF PRODUCTS

Products sold by Kobo are designed, manufactured and sold for industrial use only. Prior to use of any such product for any application other than an industrial use, the user has the sole responsibility and obligation to determine the suitability of any such product for any such application.

PATENT STATUS

Nothing contained herein shall be construed to imply the nonexistence of any relevant patents or to constitute a permission, inducement or recommendation to practice any invention covered by any patent, without authority from the owner of the patent.

LIMITATION OF LIABILITY

Kobo Products Inc. shall in no event, whether the claim is based on warranty, contract, tort, strict liability, negligence or otherwise, be liable for incidental or consequential damages, or for any other damages in excess of the amount of the purchase price.
